

### **Dr. José Ferrer Costa**

**Dr. José Ferrer Costa** is a medical doctor at Badalona Serveis Assistencials (BSA) with extensive clinical and educational experience. Passionate about advancing healthcare, his current role within the innovation team focuses on the development and implementation of Virtual Reality (VR) in real-life clinical settings, particularly in medical training and clinical projects.

Through immersive simulations, healthcare professionals can build essential skills in a safe and controlled environment, gaining confidence and experience before managing real-life patient scenarios. His work not only enhances the readiness of medical teams but also indirectly improves patient safety and care quality. By transforming innovative research into practical tools, he is reshaping the way healthcare professionals learn and practice.
