

### **Dr. Anupoma Pinky Haque**

Anupoma is a public health expert with 23 years' experience in Health Science, Technology, Policy, Management, and Diplomacy across Bangladesh, the Netherlands, and Austria.

“Patient Safety” has been a key theme in all her academic, professional and R&D innovations from 2002 till now. She has had many distinct roles in both government and INGOs collaborating with health, educational & digital health start-ups. To ensure better quality & Safety of care, she has focused on better leadership, effective communication, ethics, equity, and education.

She is currently the Management Committee Austrian representative, and project management & working group member of different COST Actions. Among other EU projects, she is constantly working for preventing medical errors and their harmful consequences with state-of-the-art digital technologies including ethical AI.

She is one of the founding members of Centre for Science-Tech Policy and Diplomacy (CSTPD) and board member of 21.Wienschule, a modern R&D organization for Rare Disease community.

She is also the Editor in Chief of the open science journals that they publish.
