

Ms. Viktória Ďurajová (Slovakia)

Project Manager for Research, Development and Innovation, F.D.
Roosevelt University General Hospital of Banská Bystrica

Viktória Ďurajová is a Project Manager for Science, Research and Innovation at F. D. Roosevelt Hospital.

In this role, she oversees a broad portfolio of projects focused on introducing and implementing innovations in healthcare, including diagnostics, treatment, patient management, digitalisation, artificial intelligence, etc.

She has extensive experience in securing external funding for projects through various funding programmes and mechanisms, including the European Structural and Investment Funds, the

Recovery and Resilience Facility, and Horizon Europe.

Drawing on her experience in implementing healthcare innovations, she believes that the main challenge lies not simply in developing innovative solutions, but in creating the organisational, financial, regulatory and human conditions that enable hospitals to implement them safely, effectively and sustainably.

At F.D. Roosevelt Hospital, she was at the forefront of the preparation and implementation of the first telemedicine projects.
