Dr. Christien van der Linden (Netherlands)

Clinical Epidemiologist, Research & Development Acute Care, Emergency Department, Haaglanden Medisch Centrum (HMC), Finalist, Butterfly Impact Award 2026

Christien van der Linden is an emergency nurse practitioner and clinical epidemiologist. She works as clinical research coordinator for acute care at Haaglanden Medical Center in The Hague, the Netherlands, and completed her PhD on emergency department crowding and patient flow in 2015.

Her research on patient safety explores ways to reduce waiting times and prevent avoidable return visits, particularly for older patients and people with mental health needs. She also studies nursing workload and patient involvement in care decisions. She supports physicians, nurses and students in developing their own research questions and writing about their findings.
